

Champion Energy and NEC Retail Select CEIVA Energy for LITE-UP Texas Energy Efficiency Program

CEIVA Homeview delivers real-time energy data to low-income Texans

Burbank, Calif. – April 30, 2015 – [CEIVA Energy](#), a utility-controlled home energy management system (HEMS) company, today announced its Homeview platform has been selected by two Texas retail electric providers (REPs) for deployment across their low-income customer base in Texas. Champion Energy and NEC Retail selected CEIVA after it was recognized by the Texas Public Utilities Commission as a recommended in-home display (IHD) for the [LITE-UP Texas](#) program.

As part of the initiative, CEIVA will partner with the two REPs to help low-income Texans reduce electricity bills.

“CEIVA technology makes energy interesting for customers who wouldn’t otherwise think about it,” said Frank Wilson, Manager of NEC Retail. “We see the Homeview as a key tool to help members understand their usage and take action to reduce their bills over the long term.”

Homeview is a SEP compliant smart meter platform that engages customers around energy use and helps drive energy savings. By collecting energy data directly from homeowners’ smart meters, Homeview delivers personalized energy information and conservation messages directly to consumers through an in-home display. Customers can also monitor energy usage remotely through the CEIVA iOS and Android apps and web portal.

“Texas is leading the way in empowering its low-income residents to take control of their energy use,” said Dean Schiller, CEO of CEIVA Energy. “By implementing CEIVA Homeview, these REPs are not only securing a seat at their customers’ kitchen tables, but also enabling them to easily achieve Texas-sized savings. I applaud the Texas PUC for providing compelling incentives to expand this important initiative and put money back in the pockets of those who need it most.”

Eligible low-income REP customers will receive the CEIVA Homeview at no cost. The Texas PUC has provided \$18.5 million to state REPs to promote energy efficiency initiatives as part of the LITE-UP Texas program.

LITE-UP Texas customers interested in receiving a free CEIVA Homeview display can contact CEIVA directly at 1-888-670-3580.

About CEIVA Energy

CEIVA Energy provides a comprehensive, flexible utility-controlled Home Energy Management System that helps utilities comply with regulations to reduce energy use and engage with customers. CEIVA Homeview is a complete engagement solution that enables utilities to deliver compelling real-time energy consumption data and energy efficiency messages that influence customers. CEIVA Entryway is an enterprise software suite that makes it easy for utilities to analyze home energy use, manage the smart meter HAN and deliver effective residential DR at scale.
